do lay people view modern medicine as a fountain of hope or a font of despair what are their experiences of modern medical care and technology and how do their views and experiences differ across different social groups combining theoretical insights with a range of qualitative and ethnographic research this volume examines lay experiences and evaluation of medicines and drugs chronic illness and life saving technology and reproductive technologies it also considers the growing popularity of complementary therapies as a potential challenge to orthodox medicine

this book for the first time bridges the gap in medical history between modern western and non western medicines it opens a new perspective in medical historiography in which modern medicine becomes an integral part of the history of medicine in non european countries

modern medicine also called as allopathic medicine happens to be the chief scientific mainstream system looking after the health of the societies all over the world it boasts of its true scientific culture transparency in approach it is progressive all the while and is quick to respond to the needs of society from time to time the last few decades have witnessed a great progress in medical science through research and technological innovations along with this growth the modern medicine has also developed many weaknesses its chief scientific foundation is getting corroded it is failing in its goal to deliver health to the society and has started generating phobia of diseases in the minds of people it is getting less cost effective and less pragmatic this book covers the pathology of this process it shows how the science is getting perverted how statistics is being misused how the technological and scientific progress is being used to generate business the health care system is getting heavily monetized hospital industry is getting corporatized the mediclaim insurance policies are being projected as the need of society medicine thus has become a business of money this has led to moral degradation the book discusses all these issues suggests some innovative solutions wherever possible it intends to put forth two important points how morality is a product of social values and finally how mind is responsible for many of the human reactions this book aims at readers medicos or otherwise who love reading thought provoking material and who believe that reading is equally an active intelligent process as writing is starting from technical aspects of medicine it escalates to discuss social economic moral ethical philosophical issues as seen through the narrow window of medical science any science in its highest evolved form has to embrace philosophy this book attempts at that the book should be treated as a frank introspection of medical practice in modern times by an active medical practitioner chiefly in the indian context it intends to introduce non medical persons to the intricacies of medical science medical practice and medical decision making simultaneously it challenges the thought process of medical practitioners and wants to create an awareness in their sensitive minds regarding the possible shortcomings of the modern medical science the aim is not only to generate conscientious humane pragmatic medical practitioners but also to generate intelligently curious patients who would help their doctors in improving their practicing skills and standards a combination of good doctors and equally good patients is needed to maintain the highest standards in medical practice the aim of medical practice is not only to alleviate bodily suffering to prevent and treat deformities or merely to prolong life but it is also to add happiness to everyone's life this book kindles the quest for the same

medicine is moving away from reliance on the proclamations of authorities to the use of numerical methods to estimate the size of effects of its interventions but a rumbling note of uneasiness underlines present day medical progress the more we know the more questions we encounter about what to do with the hard won information the essays in where's the evidence examine the dilemmas that have arisen as the result of medicine's unprecedented increase in technical powers how do doctors draw the line between knowing the acquisition of new medical information and doing the application of that new knowledge what are the long term consequences of responding to the demand that physicians always do everything that can be done is medicine's primary aim to increase the length of life or is it to reduce the amount of pain and suffering and who is empowered to choose when these ends are mutually exclusive this engaging collection of essays will be of interest to professionals interested in the evidence based medicine debate including epidemiologists neonatologists those involved in clinical trials and health policy medical ethicists medical students and trainees
