as societies become more complex and interconnected the global risk for catastrophic disasters is increasing demand for expertise to mitigate the human suffering and damage these events cause is also high a new field of disaster medicine is emerging offering innovative approaches to optimize disaster management much of the information needed to create the foundation for this growing specialty is not objectively described or is scattered among multiple different sources this definitive work brings together a coherent and comprehensive collection of scientific observations and evidence based recommendations with expert contributors from around the globe this book identifies essential subject matter clarifies nomenclature and outlines necessary areas of proficiency for healthcare professionals handling mass casualty crises it also describes in depth strategies for the rapid diagnosis and treatment of victims suffering from blast injuries or exposure to chemical biological and radiological agents

our nation faces the distinct possibility of a catastrophic terrorist attack using an improvised nuclear device ind according to international and u s intelligence detonation of an ind in a major u s city

would result in tens of thousands to hundreds of thousands of victims and would overwhelm public health emergency response and health care systems not to mention creating unprecedented social and economic challenges while preparing for an ind may seem futile at first glance thousands of lives can be saved by informed planning and decision making prior to and following an attack in 2009 the institute of medicine published the proceedings of a workshop assessing the health and medical preparedness for responding to an ind detonation since that time multiple federal and other publications have added layers of detail to this conceptual framework resulting in a significant body of literature and guidance however there has been only limited planning effort at the local level as much of the federal guidance has not been translated into action for states cities and counties according to an informal survey of community preparedness by the national association of city and county health officials naccho planning for a radiation incident ranked lowest in priority among other hazards by 2 800 local health departments the focus of nationwide response issues after an improvised nuclear device attack medical and public health considerations for neighboring jurisdictions workshop summary is on key response requirements faced by public health and health care systems in response to an ind detonation especially those planning needs of outlying state and local jurisdictions from the detonation site the specific meeting objectives were as follows understand the differences between types of radiation incidents and implications of an ind attack on outlying communities highlight current planning efforts at the federal state and local level as well as challenges to the implementation of operational plans examine gaps in planning efforts and possible challenges and solutions identify considerations for public health reception centers how public health and health care interface with functions and staffing and how radiological assessments and triage be handled discuss the possibilities and benefits of integration of disaster transport systems explore roles of regional health care coalitions in coordination of health care response

textbook of emergency medicine vol 1 and 2 is a comprehensive and contemporary exposition of the vast array of disorders and emergencies that might present to the emergency or casualty department of a hospital

monthly index of surgery and gynecology in vol 9
