supports clinicians in providing the best possible care to patients with serious illness the first comprehensive clinical guide for practicing palliative care and hospice clinicians this evidence based reference is designed to promote best practices in the delivery of safe compassionate patient care with a dual focus on evaluation and intervention the book covers all aspects of providing palliative and hospice care for vulnerable and diverse populations it provides an overview of common disease manifestations typical trajectories of illness symptom management and recommendations for nursing care written in easy to access outline format the resource is organized by body system and includes common diagnoses encountered in palliative and hospice care individual diagnoses include a definition incidence etiology pathophysiology predisposing factors subjective and objective data diagnostic tests

differential diagnoses complications disease modifying treatments palliative interventions symptom management prognosis and nursing interventions the text provides referral guidelines for serious illness as well as general and disease specific hospice care admission guidelines also included are comprehensive tables of diagnostic testing disease specific palliative and symptom management interventions prognostic and screening tools patient teaching and clinician resources and guides to pain management and wound care key features delivers current guidelines for management of symptoms associated with serious illness provides an in depth review of common conditions seen in palliative and hospice care organized by body system for quick information retrieval delivers in depth evidence based and consistently organized disease specific guidelines presents hospice and palliative care management guidelines contains reproducible patient family education handouts reviews procedures commonly used in hospice and palliative practice

this book provides an update on recent clinical practice and an in depth view of selected topics relevant to hospital medicine it is divided into four sections that explore clinical administrative systems and ethical issues each section places an emphasis on the opportunities challenges and potential directions of this burgeoning subspecialty an important topic covered extensively is how hospitalists are being called to lead on the current opioid epidemic given that they are well suited in responding to complicated challenges crossing all specialties other chapters explore worldwide practice patterns and practical application of philosophical tools in daily practice this up to date resource provides hospitalists advanced nurse practitioners medical students and administrators with the latest research trends and issues in hospital medicine

intending to fill an important gap in medical training this book presents an easy to learn standardized approach to having compassionate and collaborative goals of care conversations with patients and families a skill that can be difficult for clinicians to learn and that is not part of standard medical education curricula developed by a palliative care provider this is the first book to teach everything clinicians need to know to gently guide patients and families through what can often be difficult discussions about illness disease end of life wishes and hospice care this technique can be used to discuss any medical diagnosis or treatment be employed at any age or stage of an illness and can be used by health care professionals at any level readers will be introduced to the patterns of decline

patients follow toward the end of life criteria for recognizing when a patient's time is limited hospice care ground rules for compassionate communication and a step wise method of leading patients and families through difficult goals of care conversations in a collaborative way the book includes specific questions to ask and starter language clinicians can use for developing their own patient friendly talking points about disease progression the end of life concerns that a patient's time is limited advanced directives code status and hospice care an arc of conversation guide for use when learning this technique is also included while modern medicine is terrific at acute stabilization of illness or injury it often ignores the elephant in the room disease progression and death by doing so the healthcare system frequently misses opportunities to align patient wishes with the care they receive furthermore physicians often avoid difficult conversations with patients due to a lack of training or the assumption that hospice care represents medical or personal failure incorporating the material and technique taught in the arc of conversation into everyday practice will enable clinicians to acknowledge and discuss patient decline and to confidently include hospice care as a viable option for treatment that can support patient values wishes and priorities moving toward a continually collaborative approach with patients a shift away from physician directed care to patient centered care will enable clinicians to develop treatment plans that prioritize outcomes that matter most to patients and families improving patient and family experience of health care across their lives and providing patients with the soft landing they want at the end

role development for the nurse practitioner third edition is an integral text that guides students in their transition from the role of registered nurse to nurse practitioner

this work carefully guides the reader through the methodological policy and ethical challenges facing health economists conducting research in palliative care it has collected the opinions of many cutting edge researchers those who design and conduct economic evaluations or economics related research in end of life populations will find this book thought provoking instructive and informative the provision of care to individuals with disorders associated with advancing age such as cancer and dementia is an increasing concern amongst policy makers and providers of health and social care accordingly the burden on state and private funders in providing care to patients with these complex illnesses is of growing importance to health economists however answering the questions raised by the research community on end of life and palliative care health economics has

received little attention the authors shed light on many questions including are economic evaluation methods fit for purpose in patients at the end of life what is the best way to measure and value health outcomes in this population what are the appropriate societal rules to govern resource allocation for people at the end of life are these people more or less deserving of resources than other patients does age matter how can we define a good death for the purposes of resource allocation decision making what ethics govern research in end of life patients

this comprehensive guide thoroughly covers all aspects of neuropalliative care from symptom specific considerations to improving communication between clinicians patients and families neuropalliative care a guide to improving the lives of patients and families affected by neurologic disease addresses clinical considerations for diseases such as dementia multiple sclerosis and severe acute brain injury as well discussing the other challenges facing palliative care patients that are not currently sufficiently met under current models of care this includes methods of effective communication supporting the caregiver how to make difficult treatment decisions in the face of uncertainty managing grief guilt and anger and treating the pain itself written by leaders in the field of neuropalliative care this book is an exceptional well rounded resource of neuropalliative care serving as a reference for all clinicians caring for patients with neurological disease and their families neurologists and palliative care specialists physicians nurses chaplains social workers as well as trainees in these areas

hospice quickflips can be used as a reference for documentation hospice eligibility including lcls idt basics including the physician role his criteria for respite gip and continuous care this resource can be a teaching tool for new employees and hospice managers
